### SUMMARY

A seasoned professional with strong interest in analytical solutions that will help businesses gain more visibility, generate more leads and close deals within the shortest time frame. Proficient in python, SQL, Tableau and the Salesforce (DSaaS).

### EXPERIENCE

#### Data Analyst (Part-time)

##### Living Faith Church Worldwide

07/2022 - 11/2023 Ikot Ebido Oku Uyo, Akwa Ibom State

- Organize and transform information into comprehensible structures to help with accurate data mapping.
- Conduct thorough data cleaning to spot out stations with no PIC(Pastor-in-Charge).
- Collate reports from all the stations under Ibesikpo II in other to evaluate performance and send necessary recommendation to the State Data Analyst.
- Managed staff data to ensure no one was exploiting the system.
- Track pastoral rent application, collate new rent applications while also tracking the current running rent to ensure prompt renewal etc.

### PROJECTS

#### Jumia Webscraping Project

02/2024 Remote

https://github.com/Emkon/Jumia-Web-Scraper

- I used three python libraries for this project; BeautifulSoup(BS4), Requests, and Pandas
- I was required to scraped 900 males shoes on jumia. In order to achieve this I have to use my python experience to loop through 30 pages.
- I used 'try-except' to handle anything that might try to break the code. This was done in case the visualize pattern is not always the same as the loop goes through 30 pages.
- I printed the shoe names to test that the code works perfect before putting it in pandas dataframe and then saving it as a CSV file.
- I performed further cleaning on the dataset before sending it to my client.

#### AW Cocomputing Recruitment App

01/2024 - 02/2024 Remote

- Build data model for the recruitment app where I create custom objects with the required fields.
- Customize the user interface by creating tabs, quick actions, record types and enabling chatter for the objects.
- Improve data quality for the recruitment app by setting up validation rules for that users can keep their data consistent.
- Keep the data secure by creating permission set and PSG in the recruitment app so that data can only be access by those required to.
- Automate business processes for the recruitment app to streamline workflow.

### EDUCATION

#### B.Eng - Chemical Engineering (First-Class)

University Of Uyo

GPA  
4.77 / 5.0

#### FMVA - Financial Modelling Analyst

Corporate Finance Institute (CFI)

### SKILLS

#### Programming Languages

Python R

#### Databases

MySQL SQL Server Postgres

Google Big Query

#### Tools & Software Application
